

DeGreaser, by Steve Thomas

Here's my "secret" de greaser. Westlies Bleach White. I know it's made for tires but it works wonders on grease! I use it all the time for dissolving grease and oil. I spray it on and use a scrub brush, parts cleaning brush, or rag. Works great and rinses off clean. You can even paint after it dries. It does have bleach in it so if you are going to do a big job wear gloves so it doesn't dry out your hands.
