

Serial Number Locations on Ford Tractors (1939 – 1964)

N series 1939 - 1952

Serial numbers for 9N-2N-8N tractors are located on the left side of the engine block, just below the head and behind the oil filter.

The Jubilee-NAA 1952 -1954

Serial number location on the first 22,238 NAA models was on the left front of the engine block just below the head as shown in the photo below.

Early NAA serial number location

Serial number location on later NAA models was on the left side of the transmission case just below the flat above the starter bulge as shown in the photo below.

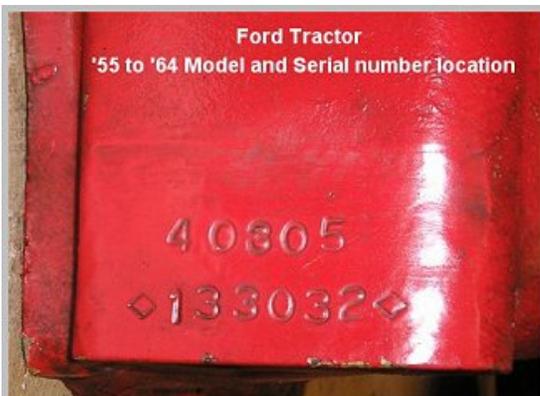

Later NAA serial number location

The Hundred series 1954 - 1957 (600-700-800-900 Series Tractors)
The "01" series 1957 - 1962 (501-601-701-801-901 Series Tractors)
The Thousand series 1962 - 1964 (2000-4000-6000 Series Tractors)

The Hundred series and newer tractor serial number location is on the flat area above and behind the starter. Below that is the actual serial number. A diamond symbol denotes the beginning and end of the serial number.

This photo shows a model 850 (800 series) with serial 93706 (1956).

Model and serial number location on early thousand series tractors is the same as the hundred and "01" series tractors.

This information was gathered from John Smith's [Quick ID Ford Tractors '39-'64](#) page.
